

**Amendments to the Specification:**

Please add the following new headings and paragraph after the Title.

**CROSS-REFERENCE TO RELATED APPLICATION**

This application is a U.S. National Stage application of PCT Application No. PCT/AT 2004/000114, filed April 1, 2004, which claims priority from Austrian Application No. A 530/2003, filed on April 4, 2003.

**FIELD OF THE INVENTION**

Please add the following new heading prior to line 10 on page 1.

**BACKGROUND OF THE INVENTION**

Please add the following new heading prior to line 13 on page 2.

**BRIEF SUMMARY OF THE INVENTION**

Please amend the paragraph starting on line 13 of page 2 as follows:

~~The object of the~~The present invention ~~is to overcome~~overcomes the above-mentioned drawbacks of the prior-art devices.

Please amend the paragraph starting on line 15 of page 2 as follows:

~~The object~~This is accomplished by a device of the type mentioned in the introduction, in which a first group of antenna elements according to the present invention has at least three antenna elements, which are arranged adjacent to one another, namely, distributed around at least one imaginary circle about a group axis, and each antenna element of the first group is electrically connected to an antenna element of a second group associated therewith.

Please amend the paragraph starting on line 8 of page 4 as follows:

Furthermore, it is favorable if the antenna elements of the first and second groups are arranged in pairs congruent to one another - optionally with a reverse orientation - in the different group planes. This permits the conversion of the treated frequencies into desired polarizations. For example, the sending antenna elements are designed as right-polarized in the application for masonry dewatering, since - according to results obtained for many years - a water motion is affected by the right-polarized waves thus produced in such a way that this is deflected downwards.

Please add the following new heading prior to line 11 of page 5.

**BRIEF DESCRIPTION OF THE DRAWINGS**

Please add the following new heading prior to line 25 of page 5.

**DETAILED DESCRIPTION OF THE INVENTION**

Please add the following paragraph at the end of page 9:

Although the invention is illustrated and described herein with reference to a specific embodiment, the invention is not intended to be limited to the details shown. Rather, various modifications may be made in the details within the scope and range of equivalents of the claims and without departing from the invention.
